BS3 Pharmaceutical Storage and Distribution Specialists

Effective temperature-controlled storage equals secure solutions for people and businesses

BS3 was launched from an arising need for cold chain storage and temperature-controlled facilities in Melbourne with a capacity to adapt to specific client requirements, including the specialist storage for Schedules 2, 3, 4, 8 & 9 products.

BS3

BS3 service large corporations and small to medium sized businesses that require specialist temperature-controlled solutions.

At BS3, we provide tailored end-to-end supply chain solutions for a wide range of products. BS3 helps you maximise your products' quality through monitored environments and ensure they are stored, safely packed and dispatched directly to your customers.

Our team

The team at BS3 have significant experience working within the pharmaceutical, retail, customer service, wholesale, distribution and cold storage sectors in Australia, Europe and the U.S. We build a strong relationships with our clients and provide adaptive environments to suit your growing needs, however big or small.

Matt Hayward – Director BS3
Matt established a boutique pharmaceutical company in Melbourne in March 2014, having moved back to Australia after many years working in the UK. He has worked in various areas of the pharmacy profession including community pharmacy, hospital pharmacy, manufacturing, wholesaling and veterinary. He is one of the founders and directors of BS3.

Stephanie Gunn – Head of Quality
Steph has over 10 years' experience in the pharmaceutical industry, specializing in temperature-controlled packaging. She has specific industry knowledge in temperature-controlled packaging for Cold Chain and controlled room temperature (CRT) requirements. Her experience spans from testing and validating temperature-controlled packaging systems, validation report writing, to temperature mapping of pharmaceutical facilities around Australia. She has commissioned and monitored over 40 sites across Australia for continuous temperature monitoring equipment in leading storage and distribution facilities.
Steph has extensive knowledge in quality management systems (QMS) and the requirements for compliance to ISO9001:2015, GDP and GWP standards. Her role at BS3 includes being head of quality and managing the facilities to ensure they are exceeding the regulatory requirements.

Emily Hovette – Head of Commercial Operations
Emily has been working in the pharmaceutical industry for 8 years since arriving in Australia from the UK. She worked alongside Matt at HL Pharma since HL Pharma's infancy, having worked in all areas of the business she has a solid understanding of customer service, logistics, storage and product handling and safety. Emily is fully trained in GDP and GWP standards and specialized in the operational and developmental aspects of HL Pharma. She is now bringing her knowledge and expertise to BS3 as Head of Commercial Operations.

Our specialist team offer advice regarding temperature-controlled environments that protect your products. We follow Australian GDP guidelines and additional security features to minimise potential risks to your products.

BS3 Pharmaceutical Storage and Distribution Specialists

FAQs

Can I visit BS3's storage facility?
Yes, we welcome potential customer to visit our facility; however, there are various health, safety, and security guidelines, so you will need to book your visit in advance.

I am an overseas manufacturer. Where can I find information about Australian licensing requirements?
The Therapeutic Goods Administration (TGA) sets high standards for products to be bought, sold and distributed throughout Australia, including pharmaceuticals, medicines and other specialists' goods. Please contact the TGA for further information.

Is there a minimum contract period when utilising BS3 storage?
Most of our clients sign a 12-month contract to use our storage facilities; however, we understand each client needs are unique and can discuss this with you. Our goal is to build trustworthy and long-term professional relationships with our clients.

What are the storage rates?
Please contact us to discuss your needs so we can provide a custom quote for you.

Is there a minimum amount of product I can store?
We have no minimum storage requirements and can store products large or small.

Is there a product you will not store for health, safety, hazardous or environmental reasons?
No. We will store products if we can and manage any requirements relating to the storage of that unique product.

FAQs

I have a unique product that cannot be damaged by the transfer of other products scents. Does your facility cater for this?
We cater for unique storage spaces to suit client's specific requirements. Our licensing ensures our capability to manage products and eliminate risks of contamination.

Why is the Good Distribution Practice (GDP) so important?
Good Distribution Practice GDP is the minimum standards that a wholesale distribution must meet to ensure that the quality and integrity of medicines is maintained throughout the supply chain. BS3 have sophisticated quality, security systems and processes in place to exceed the minimum standards.

Is there a minimum storage fee?
We require a flat fee for storage rental space, and after a discussion with one of our team members, we will also supply you with a quote for your tailor-made storage solution.

What security features does BS3 have to ensure the security & safety of my product?
BS3 security features include a secure gated facility, restricted access for visitors and staff, high-end 24/7 security cameras around the facility. We also provide backup generators to ensure there are no power issues, door scanners and various security methods and procedures for entering and leaving the facility.

Do you provide transport and logistic services?
Once your products are picked and packed, we work with our network of accredited couriers to ensure delivery to your consignee.
